(54) Title: BASEBALL TRAINING METHOD AND DEVICE THEREFOR

(57) Abstract: A Baseball/Softball Training Method and Device Therefor is disclosed. Also disclosed is a device that enables users to experience a very realistic batting practice without the high cost associated with an automated pitching machine. The device is low cost and very small in profile. The device further does not require any pitching skill in order to provide a very realistic hitting experience. The game using the device further includes a novel ball that is smaller and much softer than a conventional baseball. Finally, the ball may have holes formed in a portion of its cover to permit the user to create controllable differential drag on one side of the ball when launched to the batter.

Declarations under Rule 4.17:

- as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii)) for all designations
- as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii)) for all designations
- of inventorship (Rule 4.17(iv)) for US only

Published:

- with international search report

- before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
